
WSBA CLE Presenter Guidelines

Using Artificial Intelligence (AI) in WSBA CLE Course Materials

WSBA asks that all WSBA volunteers, including CLE presenters, disclose the use of artificial intelligence (AI) in their WSBA-related work. Please [review the full policy here](#).

If you use AI to create or partially create images, videos, and/or text in your course materials, you must include the following disclosure somewhere in your materials, filling in the blanks as applicable to your presentation:

Some material in this publication was generated using [insert AI tool] and was reviewed for accuracy by [insert name].

If you drafted the original content and used AI to edit, you may also add the following to your disclaimer: *The underlying content is original.*

If the above does not sufficiently convey the use of AI in your presentation, reach out to your WSBA Education Programs Lead to draft alternate language.
